

The All-in-One Solution for Seamless Automation

Maximum 1/0 points: 22 points (analog and digital total)

### • RS232C 1ch

- RS422/485 1ch

Ethernet port

- · Digital input 6 points (sink or source)
- Analog input 2 points (4-20mA/0-10V 12bit) (Sink input common)

#### Cartridge

- Input/output
- Analog input/output
- Temperature inputs

#### Output terminal (3 types)

- Relay output: 4 points (2A relay output)
- Transistor sink output: 4 points transistor sink output / 2 points analog output 12bit
- Transistor source output: 4 points transistor source output / 2 points analog output 12bit (4-20mA/0-10V)

FT2J

Maximum 1/0 points: 30 points (analog and digital total)

# • RS232C 1ch

• RS422/485 1ch

#### Input terminal

- Digital input 10 points (sink/source common)
- Analog input 4 points (4-20mA/0-10V 12bit) (Sink input common)

#### Cartridge

- Input/output
- Analog input/output
- Additional temperature inputs can be added

#### Output terminal (3 types)

- Relay output: 8 points (2A relay output)
- Transistor sink output: 6 points transistor sink output / 2 points analog output 12bit
- Transistor source output: 6 points transistor source output / 2 points analog output 12bit (4-20mA/0-10V)

# Wide range of control functions

### Space-saving compact design

The controller and display are integrated to save space, taking up as little as half the depth of a PLC and HMI combined for the FT1J and one-third for the FT2J. Both models are ideal, especially in areas where space is limited.

# The slim bezel design maximizes your screen viewing experience

# Time-saving and easy wiring

Push-in terminal blocks allow for tool-free wiring and provide greater vibration resistance.

The detachable terminal block enables separate wiring, improving efficiency.

# **Environmentally-friendly**

The FT2J consumes approximately 40% less power than PLC and display combined.\* It also features a battery-free design, eliminating the need for disposable lithium batteries.

\*Compared to using FC6A-C24R4CE and HG2J-7UT22TF-B (equivalent products).

# Wide range of control functions

# Dual CPU configuration for high-speed processing

The FT1J and FT2J have two CPUs working in parallel, unlike conventional products that use a single CPU for both HMI and control functions. This design enables high-speed, real-time control without compromising HMI functionality, broadening the range of compatible applications.

# Expansion cartridge with flexible I/O expandability

Up to 2 digital I/O cartridges or analog I/O cartridges can be connected to add up to 8 digital I/O, or up to 4 analog I/O. This makes it easy to add inputs/outputs when connected devices need to be replaced or updated.

## Analog I/O and high-speed counter

12-bit resolution with built-in analog I/O to control analog signals from 0 to 10V DC / 4 to 20mA. (Analog output is available only with the transistor output model.) Connecting an analog potentiometer to the analog input makes it easy to configure analog settings, such as a timer. With the high speed counter input, it can be used in combination with a rotary encoder to control tracking,

# Battery-free design eliminates the need for battery replacement

General data is stored in non-volatile magnetic memory, and clock data uses a hyper capacitor, that does not require batteries. No batteries also means no need to fill out extra paperwork to ship controllers internationally.

### PID control

A PID algorithm with cascade control is available for applications that require temperature, flow, or pressure control.

# **Excellent environmental resistance**

## Multi-touch touchscreen designed to resist mechanical deterioration

Conventional analog resistive touchscreens are not so well protected against mechanical deterioration. This is because the transparent conductive electrodes and film move with each press of the panel. The PCAP touchscreen uses a sensor board to detect changes in electrical charge to identify where the touchscreen was pressed. As the surface is made of tempered glass, there are no moving parts, allowing for lighter and more agile operations without deterioration.

The PCAP touchscreen also prevents unintended activation by water droplets, and can be used while wearing rubber gloves or gloves less than 1.5mm thick1.

1. The touchscreen may not work with gloves thicker than 1.5mm, depending on the material of the

### Retains its beauty for years

Conventional products with a plastic film on the surface will cloud over time, reducing visibility due to prolonged UV light exposure. In contrast, the FT1J and FT2J has a glass top that maintains high visibility and prevents deterioration and clouding from long-term UV exposure2.

2. If the product is used in a location where it may be exposed to UV rays for a long period. (e.g., near a window), apply a UV protective film to prevent degradation of non-glass parts.

### Wide range of operating temperatures

Suitable for use in hot and cold environments ranging from -20 to +55°C3.

# High water resistance

IP66F / IP67F protection. Resistant to direct water jets.

# **Enabling seamless communication**

# **Gateway between** manufacturing sites and cloud

Open protocols including EtherNet/IP and Modbus TCP are supported - as are communication protocols with PLCs from different manufacturers. Your FT1J or FT2J device acts as a gateway between your manufacturing site and the cloud. Reading data from other devices and forwarding it to cloud storage with MQTT communication is simple.

# MQTT communication MQTT

- Supports MQTT communication, ideal for IoT applications.
- · Direct connection to the server without a gateway.
- Supports authentication by certificate in addition to ID and password.

# EtherNet/IP™

### EtherNet/IP

- Supports EtherNet/IP communication.
- · Communication with both scanner and adapter devices.

# **Extensive connectivity with various devices**

 $<sup>{\</sup>it 1. Subject to change due to specification and service updates.}\\$ 

# OI and ladder programming in a single software

Available in Automation Organizer software.

#### Centralized management of tag data and ladder programs with tag editor

The values for each device can be changed without opening the dialog box.

Common keyboard shortcuts (copy, paste, etc.) are supported, saving you even more time.

#### Script function enables easy programming of complex processes

The script function enables easy programming of complicated processing, such as conditional branching, logical and arithmetic operations, and functions. The script debug function lets you debug your script step-by-step during simulation mode.

#### OI and ladder programming are linked even during simulations

The design and ladder programming are linked during simulations. You can confirm the full operation of your program without the actual device.

# **Applications**

# **Food Machinery**

### Streamlined systems improve hygiene levels

Food machinery uses built-in PID control functionality to regulate heat and fluid levels. By incorporating this PID control into the FT1J and FT2J instead of using a temperature controller, less equipment is needed to control the system. Both devices have strong durability, to withstand cleaning with high-powered water jets. Their glass tops can be wiped with alcohol or disinfectant, are sealed against moisture, oil and dirt, and are scratch resistant.

### Tempered glass

Stronger than standard glass, the glass touch panel passed a drop test with a 1kg steel ball (dropped onto the center of the glass from a height of 60cm).

Note: Results are from in-house testing and do not guarantee the performance of the product.

Protective sheets (accessory) are also available to prevent glass scattering in case of breakage.

### Water treatment

#### Analog and digital I/Os facilitate system automation

Connect I/O devices for monitoring and control, set required values with the touch panel, and your automated system is ready to go. The IoT-related functions can also reduce the need to visit on-site - a real benefit in terms of time and efficiency.

# 4.3-inch wide FT1J Controller with Operator Interface

#### **Dimensions**

All dimensions in mm. 176.2 000<u>00</u>0........ 

118.2

35.3

- Dimensions in blue show the mounting dimensions of the cable. USB and LAN interfaces are as shown in the dimensional drawings above. When installing, take into consideration the space required for your USB device or LAN cable.
- Install the operator interface into a panel cut-out by tightening the four mounting clips (supplied) to a torque of 0.5 to 0.6 N·m.
- Do not tighten with excessive force, otherwise the main unit may become distorted and waterproof characteristics may be lost.

#### Mounting hole layout

All dimensions in mm.

Panel Thickness: 1.0 to 5.0mm

### **General Specifications**

	Rated power voltage	24V DC			
	Power voltage range	20.4 to 28.8V DC

# Cartridge

# **Digital I/O Cartridge Specifications**

### Input Cartridge

input outringo				
Part No.		FC6A-PN4		
Input points		4 points (4/1 common)		
Rated input volta	ige	12/24V DC sink/source common		
Operating input	voltage range	0 to 28.8V DC		
Rated input curre	ent	2.5mA / 1 point (12V DC) 5mA / 1 point (24V DC)		
Input impedance		4.4kΩ		
	OFF voltage	Less than 5V		
Onorating lavel	ON voltage	8.5V minimum		
Operating level	OFF current	Less than 0.9mA		
	ON current	1.7mA minimum (at applied voltage of 8.5V)		
Input delay time	OFF → ON	0.5ms		
(24V DC)	ON → OFF	0.5ms		
Isolation		Between channels: Not isolated Internal circuit: Photocoupler-isolated		
I/O connection		No external load required for I/O interconnection		
Signal determina	ation method	Static		
Effect of improper connection	er input	Both sink and source can be connected. However, if voltage exceeding the rated value is applied, permanent damage may be caused.		
Cartridge	All ON	35mA (3.3V DC) 0mA (5V DC)		
internal current draw	All OFF	30mA (3.3V DC) 0mA (5V DC)		
Cartridge internationsumption (at 24V DC while	all inputs are ON)	0.10W		
Cable length		3m in compliance with electromagnetic immunity		
Applicable rod te	erminal	For 1-wire: Al 0.5-6 WH (manufactured by Phoenix Contact)		
Weight (approx.)		15g		

# **Output Cartridge**

Part No.		FC6A-PTK4	FC6A-PTS4		
Output points		4 points sink output (4/1 common)	4 points source output (4/1 common)		
Rated load volta	age	12/24V DC

Crimping tool	S3TL-CR06D	IDEC				
Stripping tool	S3TL-ST06	IDEC				

#### Instructions

Be sure to read the instruction manual carefully before performing installation, wiring, or maintenance work.

For details on mounting, wiring, and maintenance, see the instruction manual from the below URL.

FT1J: https://product.idec.com/?product=FT1J FT2J: https://product.idec.com/?product=FT2J-7U

FT1J

FT2J

- This product has been manufactured under strict quality control.
   However, if you intend to use this product in applications where failure of this equipment may result in damage to property or injury, ensure that it used in conjunction with appropriate fail-safe backup equipment.
- Turn off the power before starting installation, removal, wiring, maintenance, and inspection of the products. There is a risk of electric shock or fire as well as damage to the equipment.
- Emergency stop and interlocking circuits must be configured outside of the FT1J/FT2J.
- Do not use touch switches and function keys for an emergency stop circuit or an interlocking circuit. If the internal circuit of the FT1J/FT2J fails, the external equipment connected the product will no longer be protected, and serious injury to operators and equipment damage may be caused.
- Use the product within the environmental limits given in the catalog and manual. Use of the product in high-temperature or high-humidity environments, or in locations where it is exposed to condensation, corrosive gas or large shock loads, can create the risk of electrical shock or fire.
- The FT1J/FT2J is designed for use in pollution degree 2 environment (based on the IEC 60664-1 rating).
- Install the FT1J/FT2J according to the instructions in the User's Manual. Improper installation will result in falling, failure, electrical shock, fire hazard, or malfunction.
- Use a power supply of the rated value. Using a incorrect power supply may cause fire.
- The FT1J/FT2J uses "PS2" as DC power supply. (based on the IEC / EN 61131 rating)
- Use an IEC 60127 approved fuse on the power line outside the FT1J/ FT2J. (Applicable when the equipment embedded with the operator interface is shipped to Europe.)

- When exporting the FT1J/FT2J to Europe, use an EU-approved circuit protector. (Applicable when the equipment embedded with the operator interface is shipped to Europe.)
- The touch panel built-in the FT1J/FT2J is made of glass. The touch panel will break if exposed to excessive shock. Be careful when handling the FT1J/FT2J.
- The protective film affixed on the display of the FT1J/FT2J is used to protect the product from scratches during transportation. Remove the protective film before use. If the protective film is not removed, depending on the operating environment, the film may become cloudy and adhere to the display part, making it difficult to remove.
- Do not press or scratch the touch panel and protection sheet with a hard object such as a tool.
- Do not install the FT1J/FT2J in areas subject to strong ultraviolet rays, as ultraviolet rays may impair the quality of the LCD.
- Note that small black and bright dots may show up on LCD Screen.
   This is not a failure or malfunction.
- The backlight life refers to the time until the brightness reduces by half the initial value. The backlight life is not guaranteed and refers to the time until the brightness reduces by half after use at 25°C.
   The actual life depends on operating environments and conditions.
- Protection degree refers to the front of the surface after mounting.
   Although the protection structure satisfies various testing conditions, operation is not guaranteed under certain environments. IP66F/IP67F oil proof structure satisfies oil proof test conditions listed in the appendix of Japanese Industrial Standard JIS C 0920. Operation is not guaranteed when using oil for a long period of time or oil that does not satisfy standards. Please test/check before use.
- Do not disassemble, repair or modify the product. Otherwise, electric shock, fire, or malfunction may occur.

### **Ordering Terms and Conditions**

Thank you for using IDEC Products.

By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

#### 1. Notes on contents of Catalogs

- (1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.
  - Also, durability varies depending on the usage environment and usage conditions.
- (2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.
- (3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.
- (4) The content of Catalogs is subject to change without notice.

#### 2. Note on applications

- (1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.
  - Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.
- (2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.
- (3) When using IDEC products, be cautious when implementing the following.
  - i. Use of IDEC products with sufficient allowance for rating and performance
  - Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails
  - Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications
- (4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.
- (5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.
  - i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health
  - ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems
  - iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

#### 3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

#### 4. Warranty

(1) Warranty period

The warranty period for IDEC products shall be three (3) years after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.

#### (2) Warranty scope

Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.

- i. The product was handled or used deviating from the conditions / environment listed in the Catalogs
- ii. The failure was caused by reasons other than an IDEC product
- iii. Modification or repair was performed by a party other than IDEC
- iv. The failure was caused by a software program of a party other than  $\ensuremath{\mathsf{IDEC}}$
- v. The product was used outside of its original purpose
- Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs
- vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC.
- viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)

  Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

#### 5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

#### 6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.

- (1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)
- (2) Maintenance inspections, adjustments, and repairs
- (3) Technical instructions and technical training
- (4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
